BLAST CHILLERS

MT SERIES

BLAST CHILLERS

MT SERIES

A Large inspection door:
for an easier cleaning
and maintenance.

B Evaporators:
High speed air homogeneously
distributed inside the chamber
by modular batteries of
evaporators.

C Walls thickness:
100 mm panels insulation for an
important reduction in energy
consumption.

D Entry and exit on opposite sides:
to optimize the process flow.

E Semi-hermetic remote
condensing unit
Bitzer compressors.

More solutions

as Ozone Sanitation, stainless
steel construction, additional
installation kit, 400 mm of
tunnel length extension,
different doors dimensions and
much more are available upon
request.
